EMI MOD Request - CE6798 - OP8073 - Low Drumclog
To: Oliver Piper

16 September 2021 at 13:01

Dear Oliver,

We sent the following reply on 14th September. Did you not receive it?

Name/Location: EMI MOD Request - CE6798 - OP8073 - Low Drumclog

Site Centre/Turbine at NGR/IGR:

Grid Ref: T1: X: 263136, Y: 641040 T2: X: 262952, Y: 640478 T3: X: 262653, Y: 640813

Development Radius: 0.1KM

Clearance up to 200M Tip height

This proposal **cleared** with respect to radio link infrastructure operated by:

Scottish Power and Scotia Gas Networks

JRC analyses proposals for wind farms on behalf of the UK Fuel & Power Industry. This is to assess their potential to interfere with radio systems operated by utility companies in support of their regulatory operational requirements.

In the case of this proposed wind energy development, JRC does not foresee any potential problems based on known interference scenarios and the data you have provided. However, if any details of the wind farm change, particularly the disposition or scale of any turbine(s), it will be necessary to re-evaluate the proposal.

In making this judgement, JRC has used its best endeavours with the available data, although we recognise that there may be effects which are as yet unknown or inadequately predicted. JRC cannot therefore be held liable if subsequently problems arise that we have not predicted.

It should be noted that this clearance pertains only to the date of its issue. As the use of the spectrum is dynamic, the use of the band is changing on an ongoing basis and consequently, developers are advised to seek re-coordination prior to considering any design changes.

Regards

Wind Farm Team
