Position Title: Project Engineer

Company: CleanEarth Energy

Salary: £24,000 - £30,000

Location: Wadebridge, Cornwall

Duration: Full-time contract.

Closing date:

Company background:

CleanEarth design, build, and operate wind farm and solar PV projects throughout the United Kingdom.

Founded in 2010, our industry-leading in-house team of engineers, planners and project managers provide a complete 360-degree service, incorporating every aspect of the project development process and ensuring CleanEarth are always one step ahead.

This unique approach allows CleanEarth to tackle every project head-on, with the in-house resources to provide a truly holistic service.

Job Description:

CleanEarth are looking for a motivated and organised Project Engineer to work on our upcoming wind farm projects. Sitting in the technical team, the Project Engineer will provide high quality engineering support to projects in the Development, Construction and Operational phases.

Responsibilities will include:

- Production of optimised wind farm site layout drawings, access modifications, swept path analysis, legal and planning drawings
- Estimating and tracking project costs, aiming to reduce cost through design.
- Assisting with projects in development and under construction, striving to achieve the Highest Health, Safety and Quality standards
- Identifying and reducing risk through design, ensuring projects under development are both practically and financially feasible
- Provision of technical input to early stage and pre planning projects
- Procurement and coordination of 3rd party technical services
- Support wider improvement/development of Cleanearth design processes and procedures.

Essential Requirements:

- Highly proficient in the use of AutoCAD and Vehicle Tracking software
- Basic knowledge of onshore wind development and construction processes
- Methodical, accurate and detail focussed approach.
- Awareness of CDM regulations
- Excellent communication and organisational skills.
- Self motivated with the ability to prioritise and manage a demanding workload
- Flexibility to visit our sites throughout the UK

Desired Skills:

- In depth knowledge of transport and construction methods as they relate to onshore wind projects
- Familiarity with wind farm BoP (Balance of Plant) and TSA (turbine supply agreement) contracts
- Civil3D and Infracore proficiency
- Surveying/setting out experience

How to Apply: Please send a C.V. and covering letter outlining why you are suitable for the role to
