Subject: Re: Dubbers China-Clay Works, Nanpean, St. Stephen-in-Brannel

You don't often get email from wftracker@jrc.co.uk. Learn why this is important

If any details of this proposal change, particularly the position or scale of any turbine(s), this clearance will be void and re-evaluation of the proposal will be necessary.

Name/Location:

Dubbers China-Clay Works, Nanpean, St Stephen-in-Brannel

Site Centre/Turbine(s) at NGR:

T1 - 197652 056441 T2 - 197501 056094

Development Radius: 0.1

Hub Height: m Rotor Radius: m

This proposal is **cleared - subject to 25m Micrositing -** with respect to radio link infrastructure operated by the local energy networks.

JRC analyses proposals for wind farms on behalf of the UK Fuel & Power Industry. This is to assess their potential to interfere with radio systems operated by utility companies in support of their regulatory operational requirements.

In the case of this proposed wind energy development, JRC does not foresee any potential problems based on known interference scenarios and the data you have provided. However, if any details of the wind farm change, particularly the disposition or scale of any turbine(s), it will be necessary to re-evaluate the proposal.

In making this judgement, JRC has used its best endeavours with the available data, although we recognise that there may be effects which are as yet unknown or inadequately predicted. JRC cannot therefore be held liable if subsequently problems arise that we have not predicted.

It should be noted that this clearance pertains only to the date of its issue. As the use of the spectrum is dynamic, the use of the band is changing on an ongoing basis and consequently, developers are advised to seek re-coordination prior to considering any design changes.

Regards

Wind Farm Team

Dear Sir/ Madam.

We are proposing a new wind turbine development and would like to check if the development would have any effect on your services.

The proposed development is for two wind turbines on land at Dubbers China-Clay Works, Nanpean, St. Stephen-in-Brannel, PL26 8XT.

Please find the details of the proposed turbines below:

• Turbine type: 2 x Vestas V117

• Hub height: 76.5 metres

Maximum tip height: 135 metres

Turbine locations:

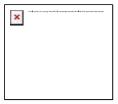

T1: E 197652, N 056441 T2: E 197501, N 056094

Micro-siting allowance: 25 metres

Please do not hesitate to contact me if you require any further information for the assessment of our development.

Kind Regards,

Project Manager Planning & Environmental
